<u>Wild Horse and Burro</u>				
Source Document	Type	Description	Yes/No	Comments
WDRMP 2015	NTL	<b>NV-WD-WH&amp;B-01</b> (WD RMP, Actions D- 4.1) Wild horse or burro populations are known to use some or all of the proposed lease area. If proposed fluid mineral activities are to occur in horse management areas (HMA) it may be necessary to avoid or develop mitigation measures to reduce adverse impacts to horses and/or burros. These measures would be designed in a manner that does not hinder the wild and free-roaming behavior of the horses and burros and may include, but are not limited to, providing alternative water sources for horses or burros of equal quality and quantity. Additional specific measures to protect horses and burros may be developed during review of proposals.	Yes
